

# Pinnacle

## Strengths

- Double use : cover crop and forage
- High yield in dry matter
- Late at maturity
- Good tolerance to crown rust

## Agronomic characteristics

● Earliness at heading	5 (late)
● Earliness at maturity	5.5 (mid-late)
● Straw height	5 (medium)
● Lodging	5.5 (medium to good)
● Crown rust	6.5 (good)
● Tillering	High

## Biomass production

High yield in dry matter.

Variety	Dry matter (T/ha)
<b>PINNACLE</b>	<b>6.1</b>
Control Avena Strigosa	5.8
Control Spring oat 1	3.4
Control Spring oat 2	3.1

AO's results, sowing in August

## Sowing from April to early September

### Spring and summer sowing

Manage the crop as spring oat

### Cover Crop sowing (after harvest to early September)

Prioritize sowing after harvest to keep soil moisture

Adapt sowing density to reach a sufficient soil cover

Reduce seed density in case of mixing with other species as pulses for example

## Destruction

The cover crop can be destroyed by freeze (depending on crop stage), rolling or ploughing.

The descriptive list is made from French official results for the varieties listed in France (1=susceptible, 9=very good level) ; \*: Agri Obtentions' notations; ( ): notations to be confirmed
